LEVER HANDLES and PULL HANDLES

MANIGLIE e MANIGLIONI

TO PROTECT WHAT WE HAVE KNOWN AS THE BEST OF POSSIBLE WORLDS, IT IS NECESSARY TO CHOOSE THE SMALLEST DETAIL. GRASPING QUALITY, KNOWING HOW THINGS ARE DONE, AND HOW PEOPLE DO IT, IS NOT A POSSIBILITY, BUT THE ONLY WEAPON TO WIN. PER PROTEGGERE QUELLO CHE FIN QUI ABBIAMO CONOSCIUTO COME IL MIGLIORE DEI MONDI POSSIBILI, È NECESSARIO SCEGLIERNE FINANCHE IL PIÙ PICCOLO PARTICOLARE. IMPUGNARE LA QUALITÀ, SAPERE COME SONO FATTE LE COSE E COME VIVONO LE PERSONE CHE LE FANNO, NON È UNA POSSIBILITÀ, MA L'UNICA ARMA PER LA VITTORIA.

The stainless steel AISI 316L is an austenitic alloy. It is distinguished from others inoxidizable steels by the high percentage of molybdenum which gives it a special resistance to pitting corrosion and stress corrosion. In this kind stainless steel the nickel's presence is increased in order to guarantee stability. Further, the "L" stays for low carbon and in fact the quantity is less or equal to 0,03%. This feature prolongs the chrome carbides precipitation's time and avoids the risk of intergranular corrosion during the welding process.

L'acciaio inox AISI 316L è una lega austenitica. Si distingue dalle altre leghe di acciaio inossidabile per l'alta percentuale di molibdeno che garantisce una resistenza superiore alla corrosione e agli agenti atmosferici. In questa lega è maggiore anche la percentuale di nickel per garantire una maggiore stabilità. Inoltre la lettera "L" indica un basso contenuto di carbone che è uguale o inferiore allo 0,03%. Questa caratteristica prolunga i tempi di precipitazione del cromo-carburo evitando il rischio di corrosione dopo la saldatura.

ADA

The Americans with Disabilities Act of 1990 (ADA), including the following amendments, fixes that door and gate hardware shall be operable with one hand and shall not require tight grasping, pinching and twisting of the wrist. Moreover a force of maximum 5 pounds (22,2 N) is required to operate the hardware. All pba ADA products are designed and produced in compliance of the above requirements. Further when the handle is indicated as U-shaped it is designed as recommended by the ADA Standard for Accessible Design, dated 1994.
Final interpretation of ADA compliance is the responsability of the specifier and should be determined relative to specific project conditions and local codes.

La normativa ADA (Americans with Disabilities Act) del 1990 e le successive modifiche stabilisce che sia necessario poter operare con una mano sola sulle maniglie di porte e cancelli e che tale operazione non richieda una forza eccesiva nella presa né la rotazione del polso, specificando inoltre che per azionare la serratura sia richiesta una forza di max. 22,2 N. Tutti gli accessori pba sono stati progettati e prodotti nel rispetto di questa normativa. In particolare, le maniglie che presentano una forma ad 'U' sono raccomandate dall' ADA Standard for Accessible Design del 1994.

TITLE 24

The California Building Code issued by the California Building Standards Commission (CBSC) refers to the ADA requirements for operable parts and defines that lever handles shall be curved within a return of 1/2" (12,7mm) to the door in order to prevent catching of the clothing of persons during egress. Our lever handles indicated as TITLE 24 are designed in compliance with the requirement.

Le regole stabilite dal CSBC (California Building Standards Commission) all'interno del California Building Code fanno riferimento alla normativa ADA per le maniglie e stabiliscono che l'impugnatura della maniglia deve avere alla sua estremità una curva di ritorno in modo da lasciare uno spazio libero di massimo 12,7 mm tra la maniglia e la porta stessa per evitare che gli abiti rimangano impigliati sulla maniglia durante l'uscita. Le maniglie pba indicate come TITLE 24 sono progettate nel rispetto di queste disposizioni.
