Flat Move *by Artis*
Active partitions for redefining our flexible workplace

Now more than ever, we need to think on our feet.

2020 taught us a lot about people, technology, and the nature of how we work best. And most of all, about change. Things will never be the same again.

Let's be real -

Working from home is great, part of the time, for many people, and it's here to stay. But we miss being together!

The best ideas come from impromptu convos, brainstorming over coffee & drinks, and random collisions.

The highest human work isn't about cranking out mindless tasks, that's what computers are for.

We want to bring together all people, in places they want to be, to create the next big thing (or little thing!) that makes the world a better place to be in.

Flat Move, by Artis, enables our vision for that future.

Joe Mascaro Andrea Wainer Rebecca Alba

Flat Move is a new way to create truly flexible interiors.

Independent, movable, active partitions come together to define spaces that can be rearranged at any time.

These are not space dividers, they're space creators.

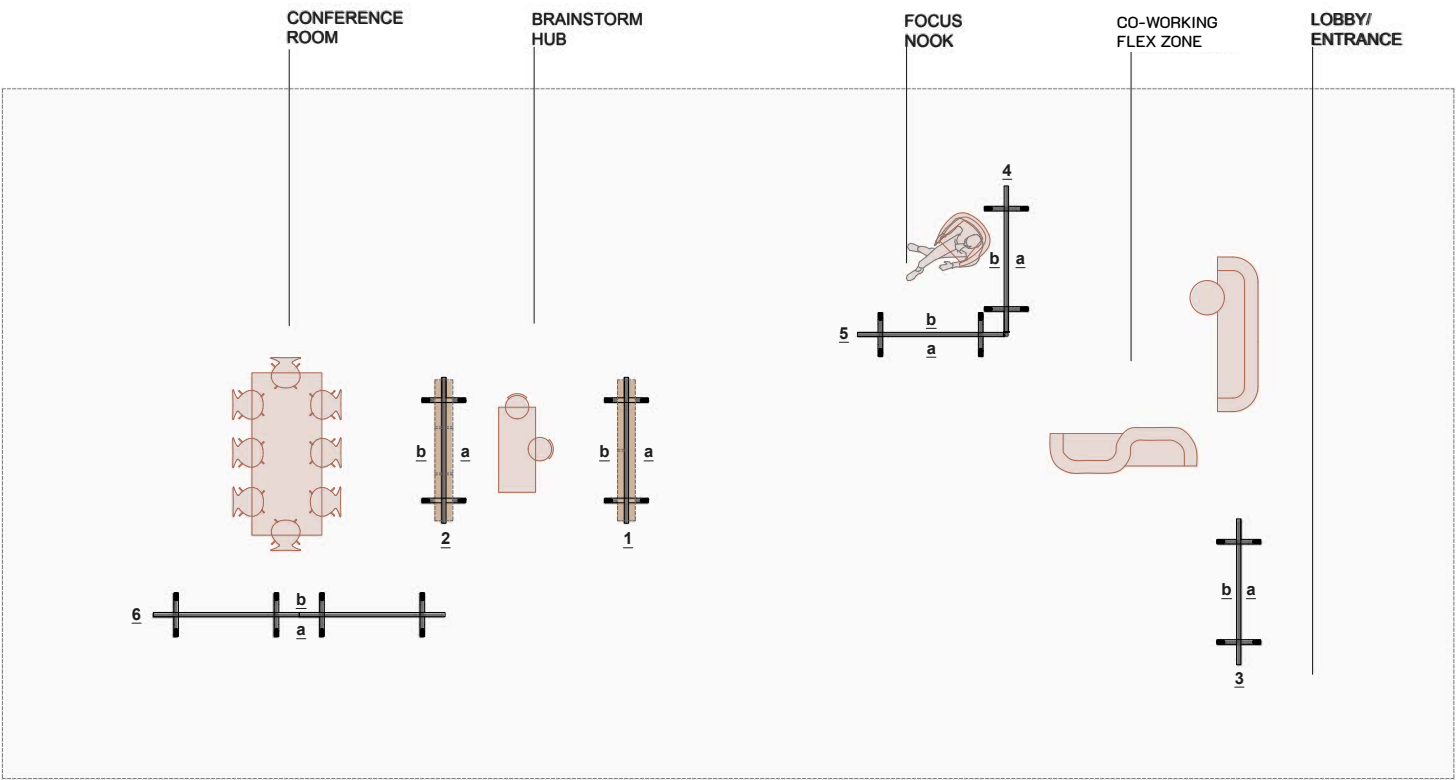

Transform an open floor plan into functional zones with dynamic walls and rooms.

The customizable framework allows for infinite functions, and Flat Move is meant to be used.:

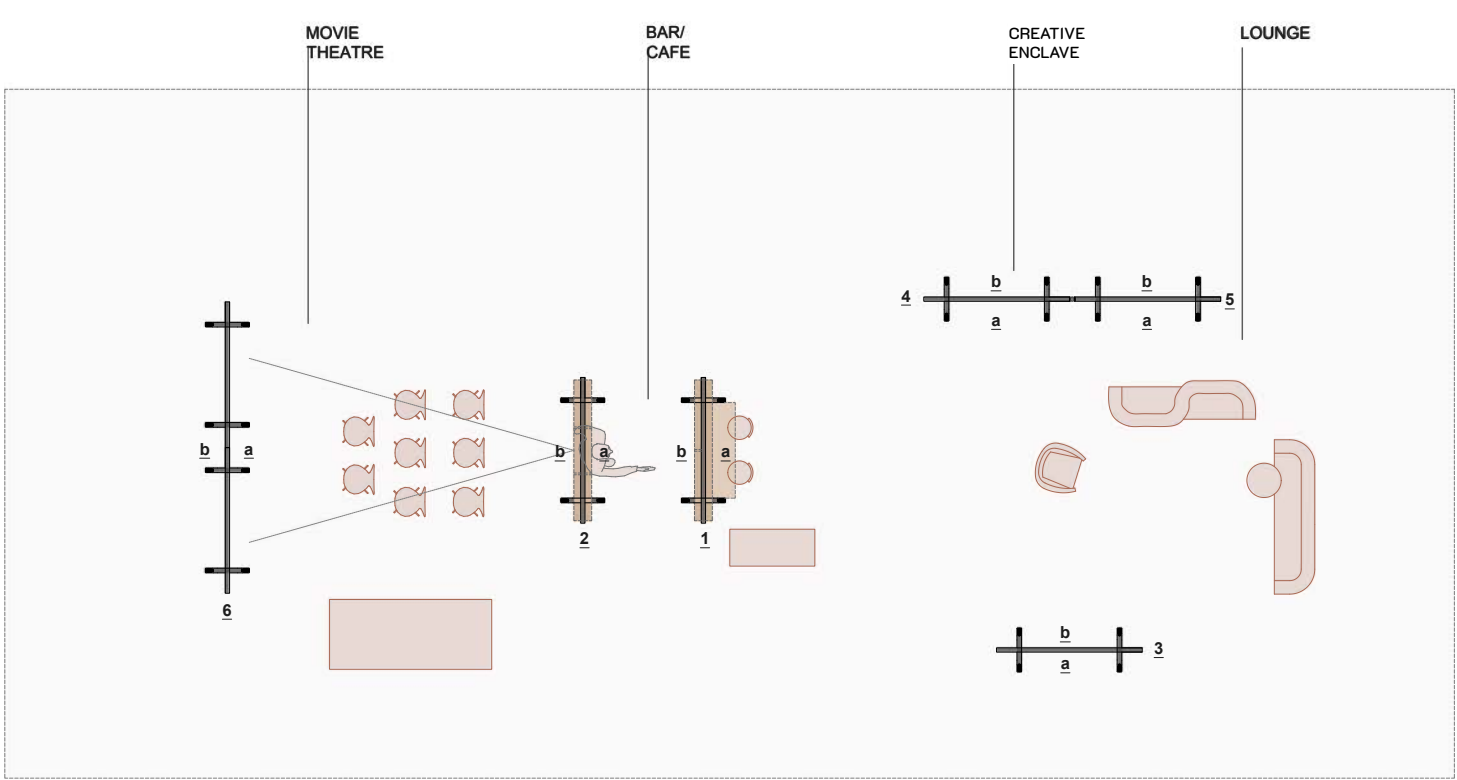

Interactive features bring people together for collaboration, innovation, and teamwork. The vertical workspace encourages wellness by getting people up and moving around throughout the day.

Interpreted Interiors

Floor plan during the day

Floor plan at night

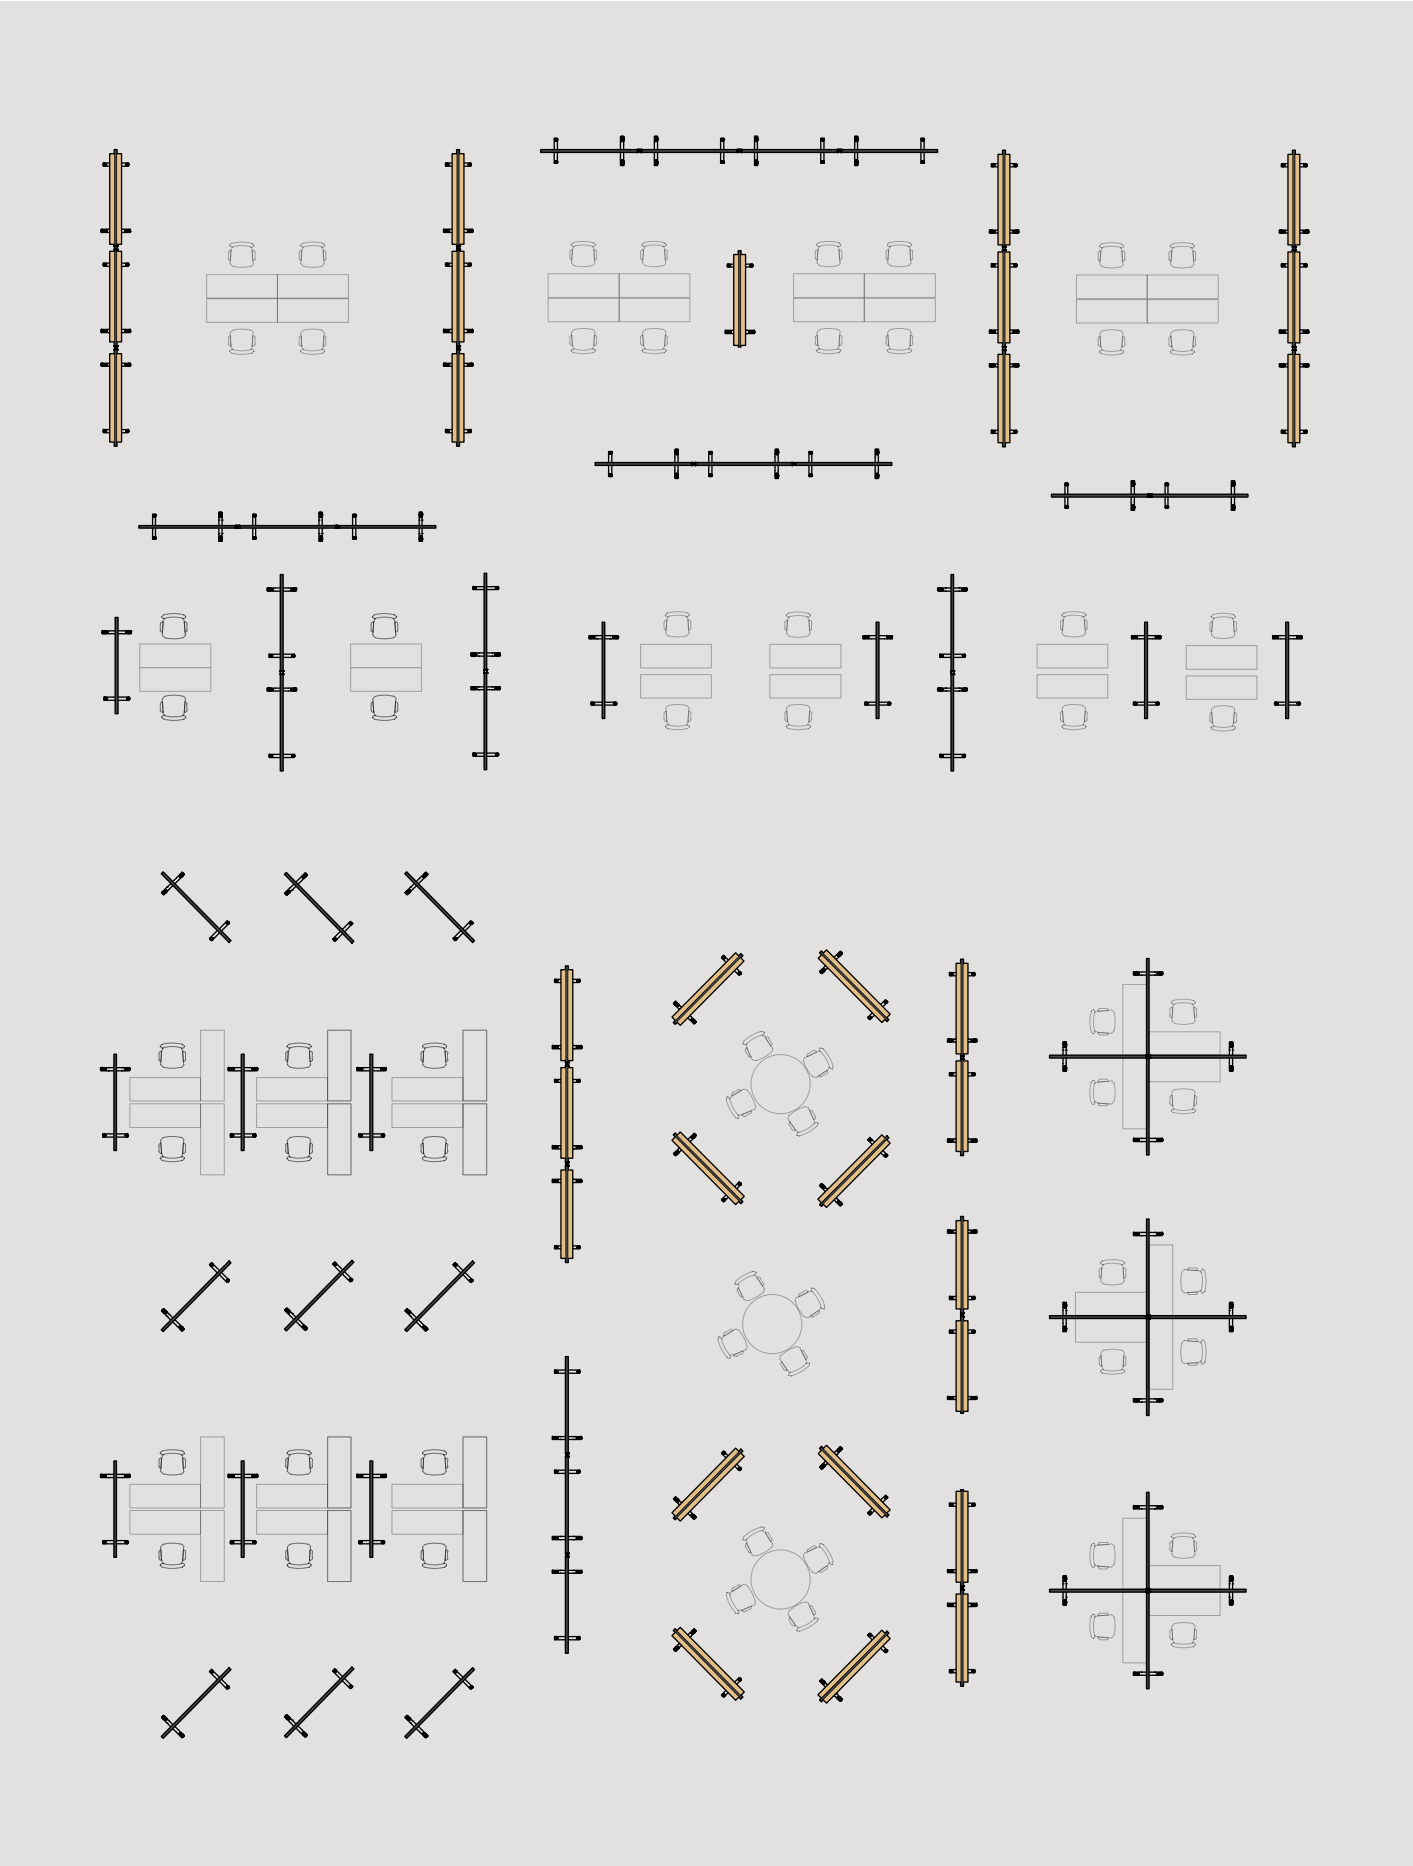

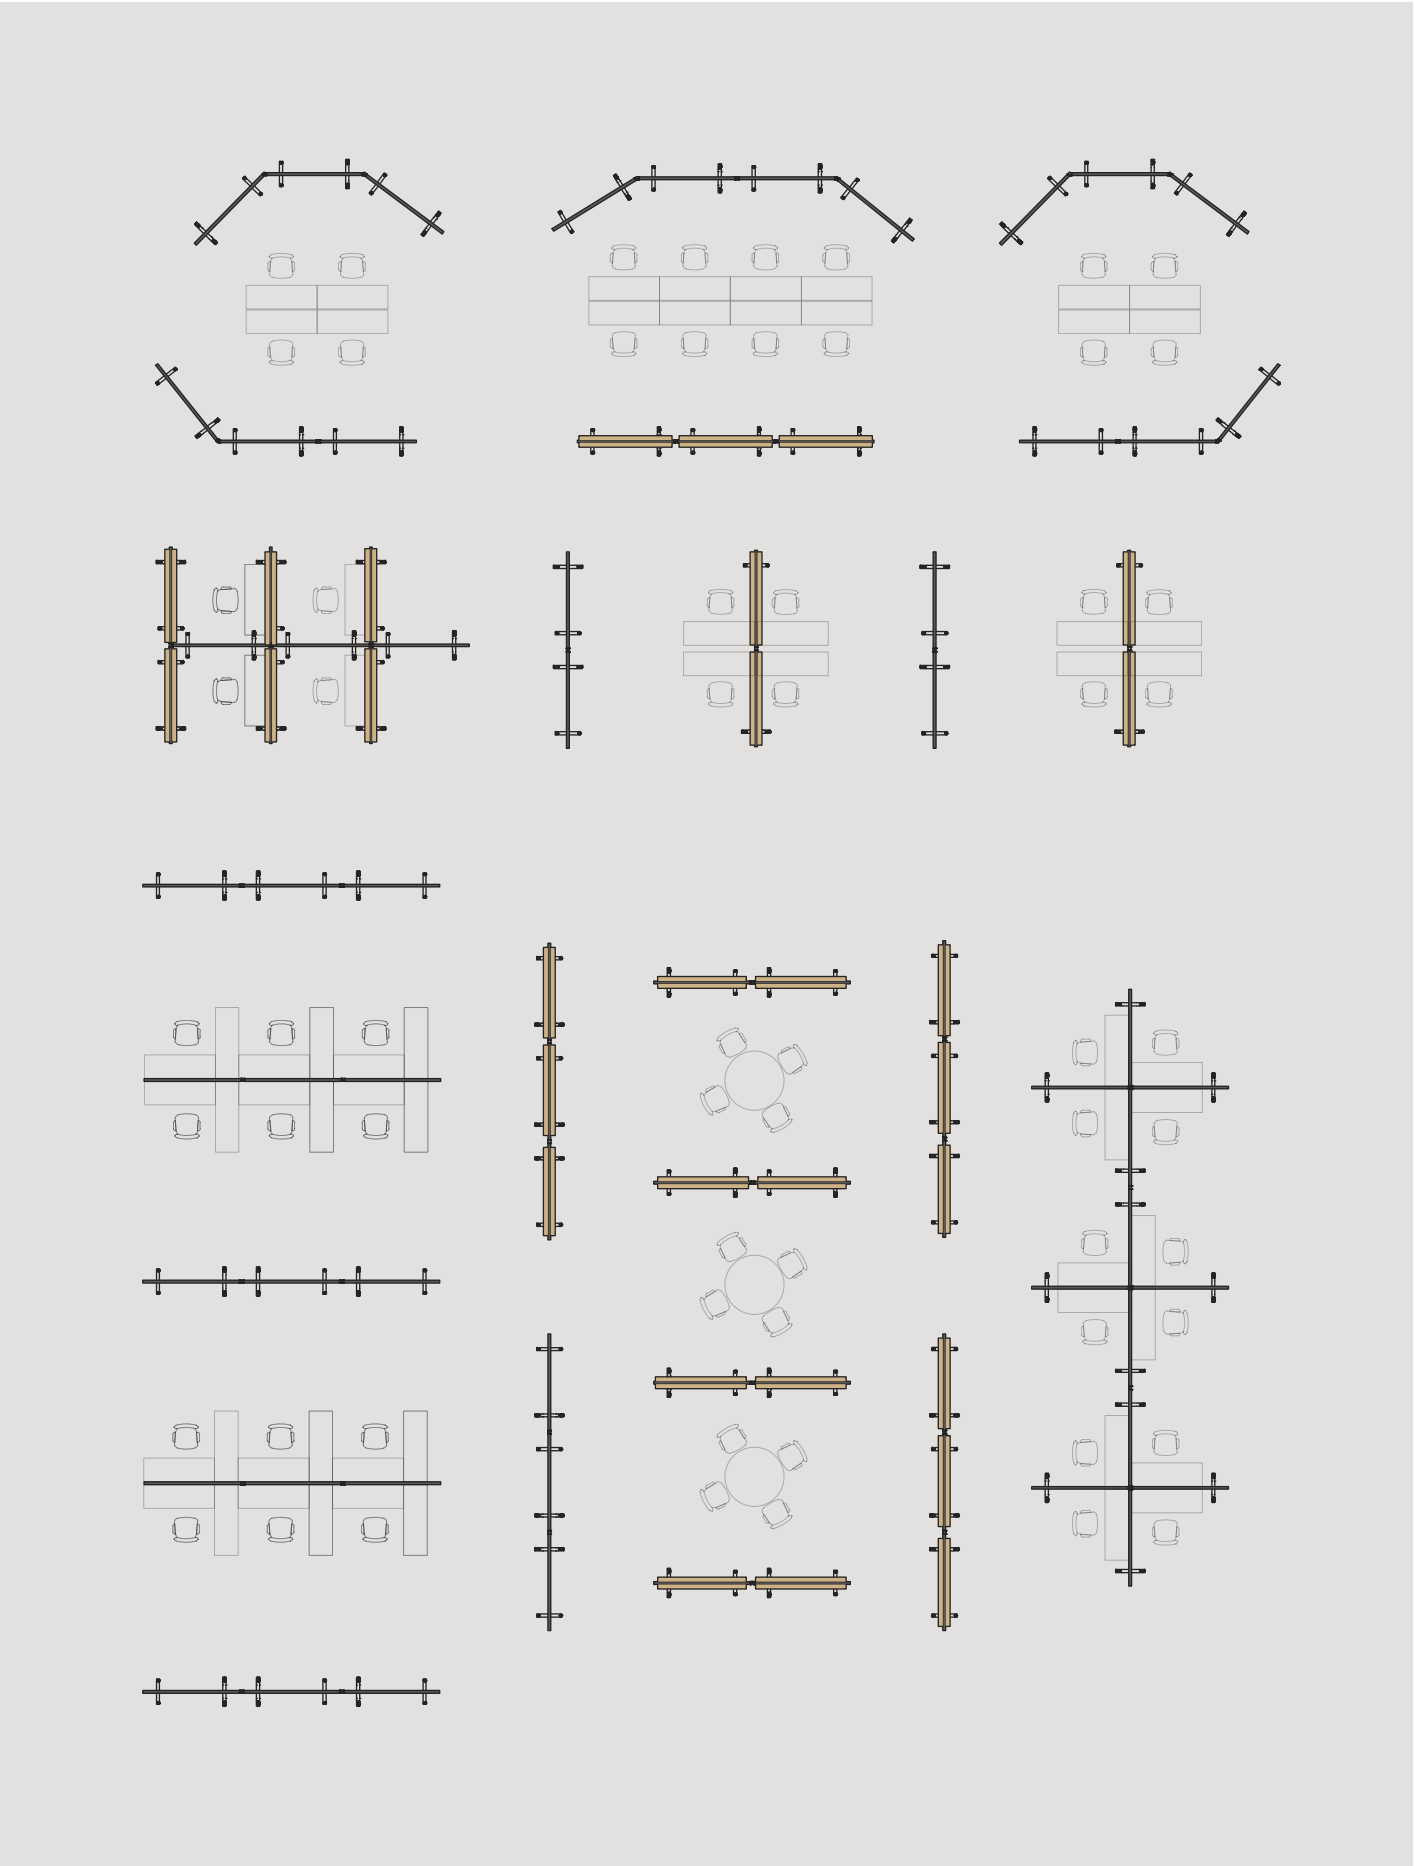

What’s your rendition?

The amazing thing about *Flat Move* is its ability to become whatever you want. Think about creating interactive arrangements. It’s not as much about the walls as the spaces between.

During the day you want max productivity for agile teams, then at night you turn up the social dimension and keep it more casual. Compose and recompose your space to be in tune with the moment.

“The measure of intelligence is the ability to change”
-Albert Einstein

People crave a variety of places to work: huddle rooms, private nooks, event spaces, team zones, libraries, innovation hubs, co-working, you name it.

The workplace of the future is agile.

It's not about "open" vs "closed" office space. Every company is different and every employee and team is unique.

You can change your environment to suit you.

As companies move to more flexible working styles, their spaces can adapt to the different people using them each day.

Flat Move enables you to make dynamic transformations quickly and easily within existing spaces, reducing material waste and expensive construction.

Really sustainable interiors have to adapt over time.

A blank canvas for your imagination

Flat Move is built on a customizable framework for limitless design choices.

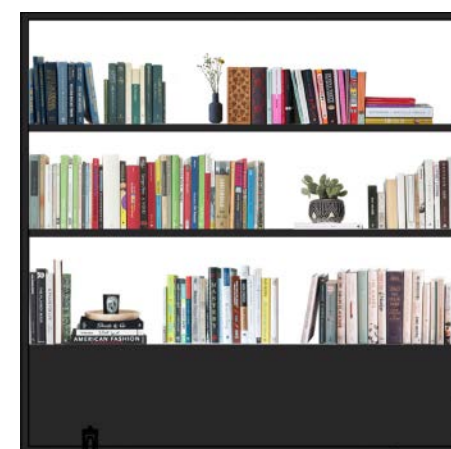

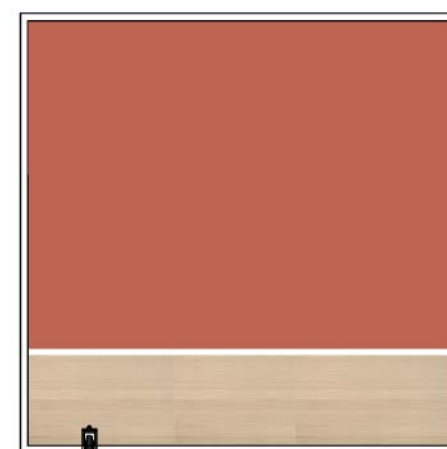

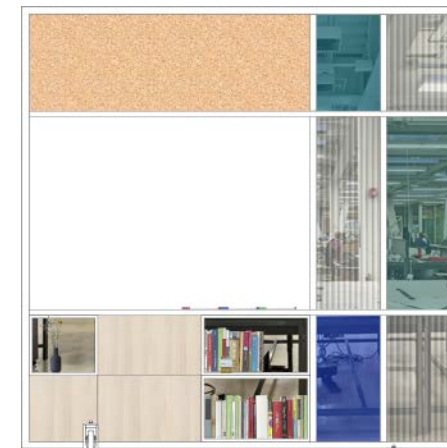

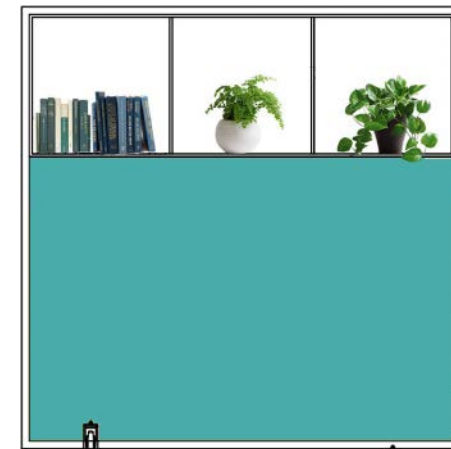

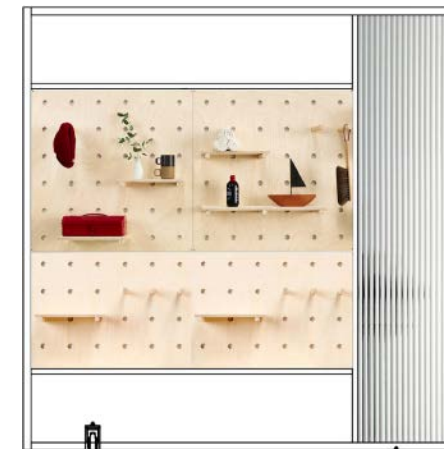

Each movable unit is up to 8'-2" by 8'-2". Mix and match shelving and solid surfaces.

Choose your size, materials, functionality, and colors, and we'll put it all together – our team is here to help you take your Flat Move from concept to reality.

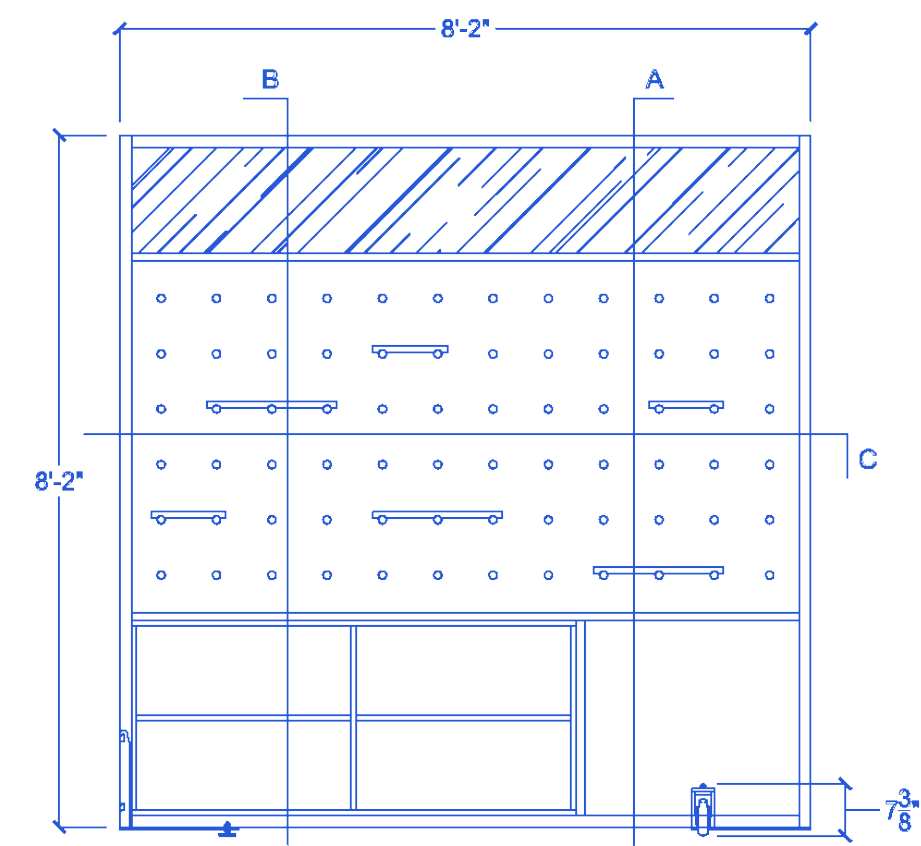

When it's all said and done, your Flat Move arrives complete with all materials and everything you need.

Whether you're a designer or not, creating your own Flat Move is easy. Start from an idea or sketch, or just take one of the examples and tweak it to make it your own.

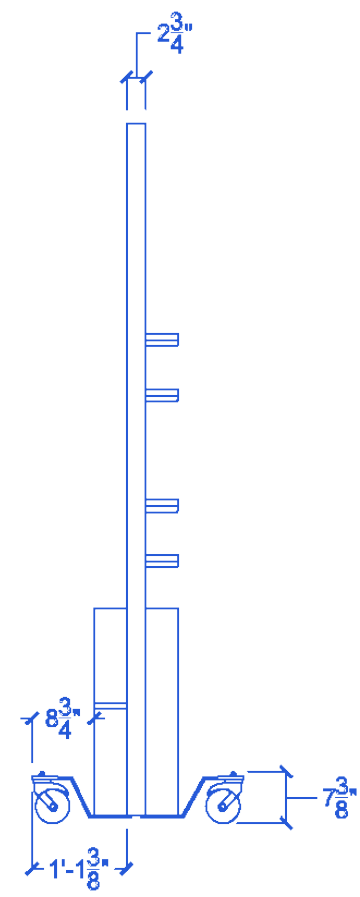

For more inspiration, check out some of the standard materials and functionality on the next few pages.

Flat Move is designed, created and engineered by Artis, and brought to the US through collaboration with Habitat Matter.

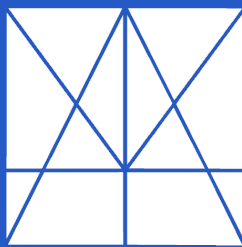

Founded in 1964 in Lleida, Spain, Artis has a long history of manufacturing partitions for architectural interiors. With a deep expertise in research and development, they design and manufacture innovative wall systems that are versatile and highly customizable.

In 2019, foreseeing the trend that companies need more flexible and adaptable spaces, Artis started developing a new type of wall system with sustainability and innovation in mind.

After a complex manufacturing, definition, and commissioning process, Flat move was born. It is the natural evolution of 'Flat by Artis' wall systems. Designed for flexibility from start to finish, it is the most dynamic wall system available today.
