FLAT MOVE

2020 CATALOG

RUBIK

Bookshelves, cubbies, storage units, the 1 foot deep modules can adapt it all. They can be open on both sides, just one side, or fully enclosed. The specific layout is up to you and can be different on each side.

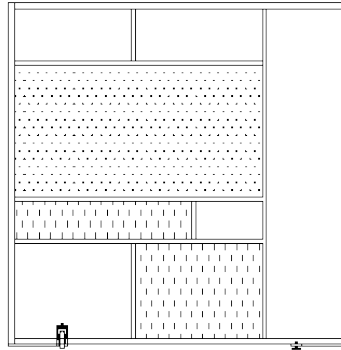

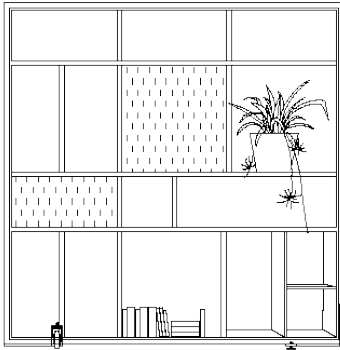

VISUAL

This truly movable glass partition wall gives you the ability to divide rooms while still allowing light to pass through, so the layout still feels open. Unique to Visual, you can use shaped glass and various colors for the framing - let your imagination run wild.

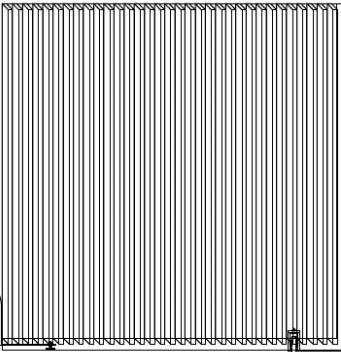

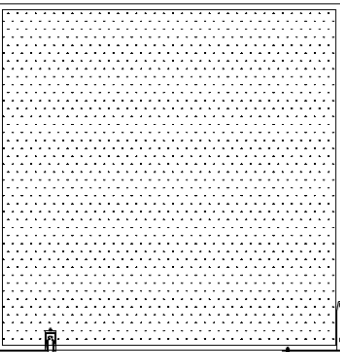

INTERACTIVE

All the bells & whistles come together on this one. For going back to work today, you might want an integrated hand sanitizer dispenser, wastebasket and signage showing social distancing protocols. For tomorrow, you might want a standing desk, a bookshelf and all the plants.

WOOD

A classic look with 4"x1" vertical wood slats set at a 45-degree angle, the louver style provides subtle visual privacy. Reminiscent of a vanity screen, these are great for seating or reception areas and hotel lobbies. For a less classic look Flat Move can include a wooden pegboard shelf with wooden pegs and moveable shelves, ideal for your store, home office or workplace.

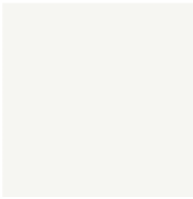

FRAME FINISHES

RAL - 5005

RAL - 9005

RAL - 9010

* All powder coated RAL colors available.
Anodized aluminum finishes available upon request.

Flat Move is engineered and designed by Artis. Founded in 1964, Artis has a long history of manufacturing for architectural interiors. With a deep expertise in research and development, they design and manufacture innovative wall systems that are versatile, highly customizable and ideal for a wide range of client types.

Artis developed Flat Move with the dynamic workplace in mind, a mobile partition customized for every client need that can be used to flexibly divide offices and adapt the work space to changes in team size or room function without renovations or material waste. Thanks to this modularity, Flat Move is here to support clients on their way into an uncertain future and to reduce plan office anxiety, making dynamic transformations easy and quick within existing spaces.
