We are innovation rebels: permanent beta. — Sven Erni, Co-Founder

YOUR EXTENDED TEAM

Driven by innovation for beautiful, yet functional design addressing today's environmental and social challenges, we strive to be the rebels who tirelessly think one step ahead to develop sustainable acoustic solutions for the design industry: permanent beta.

At IMPACT ACOUSTIC® we specialize in turning single-use materials into high-quality finished products for acoustic comfort.

We understand how Environmental Social Governance (ESG) matters to the new generation of international design practitioners and we want to give them all the tools to address acoustic challenges. In addition to a wide and customizable array of products, we specialize in bespoke solutions. A network of creative application engineers, product designers and architects translate your ideas into a tangible product.

Sven Erni & Jeffrey Ibañez
Founders

Following a great success in their own careers in architecture and interior design in Asia and Europe for more over a decade, their passion for design and innovation created a new era in acoustic solutions where design meets sustainable development goals.

Architect (ROK)

An Idea, no matter how silly it may sound, drives thinking. Thinking inspires change.

— Jeffrey Ibañez, Co-Founder

ACOUSTIC ADVISORY

The elements used to optimize acoustic well-being must have the right performance and support your design intent – whether classic or modern, purist or opulent, with subtle touches or bold colours, discreet or eye-catching. We help you to solve acoustic challenges while meeting your design goals and budget.

PLANNING + NESTING OPTIMIZATION

In the design phase, too little attention is paid to the efficient planning of our material. A high level of cut-offs automatically results in increased costs of the same magnitude and environmental damage. We use specialized tools to help you minimize material wastage in your projects through optimized cutting plans according to your specifications.

PARAMETRIC DESIGN

We do not draw but program your unique ideas. This approach delivers unique and sophisticated designs that perfectly meet your requirements. We combine unique expertise in the field of computational-aided design and of digital manufacturing with a deep understanding of the craftsmanship and knowledge of materials. We create unique designs according to your ideas and budget.

PROTOTYPING & DIGITAL MANUFACTURING

We help develop prototypes into a tangible working product across industries. We combine the latest technology and high-precision cutting centres with a wide knowledge of highly qualified application engineers and product designers who have amassed expertise across a broad range of industries. Getting IMPACT ACOUSTIC® involved at the beginning accelerates the process of a new design project.

INNOVATION

IMPORTANCE OF LIGHT

Lighting in the workplace impacts employee performance. It influences cognitive performance and problem-solving abilities and can also improve our mood and interpersonal relationships at work, resulting in better job satisfaction: happy employee, happy company.

We offer the best performance of any linear workplace lighting fully integrated into our acoustic sails. In addition, our latest innovation presents a revolutionary low-glare technology to create bright ceilings without noticing the source of light. Simply beautiful!

Bartenbach®

PSYCHOLOGY OF COLOUR

Most people recognize that the state of their working environment can make them feel enthusiastic or tired. However, they may not realize the impact colour used at work can have on their emotions in other ways. Certain colours may leave them uninspired, while others can help you feel energetic, relaxed or creative.

For example, yellow can cause eye strain in the workplace, while red stimulates and excites employees. Green and blue can create feelings of peace of mind and relaxation.

All of our 27 colours and 8 colour families are matched with each other. Which is your favourite?

SUSTAINABILITY

WE UPCYCLE
OVER
20
MILLION
PLASTIC BOTTLES
PER YEAR

PIONEERING THE WAR AGAINST SINGLE-USE PLASTIC

Dematerialisation, recycling, upcycling and life cycle management are the foundation of our products and services. Our next big step is to develop products from our production waste through circular design principles. All our products are Cradle to Cradle Certified, and LEED v4 accredited.

In the fight against the use of single-use plastics, we support the global Trash Hero movement with a financial fund, organization and participation in their cleanup events.

SOCIAL ENGAGEMENT

We work closely with handicapped professionals and develop solutions that we use in our products. Get in touch with us to find out more about our ecological and social initiatives.

WAVE SINE

**BESPOKE PARAMETRIC DESIGN.
RAIFFEISEN BANK.**

From conception to realization, our parametric design team uses algorithmic-based processes that deliver unique and sophisticated acoustic designs perfectly tailored to your requirements and budget.

ACOUSTIC CEILINGS

Acoustic ceilings offer the largest possible surface area for soundproofing. Our standard and bespoke solutions allow acoustic well-being to be controlled in a creative and effective way. Let's talk about your unique design ideas.

**ACOUSTIC LIGHTING AND WALL COVERING.
TORADEX.**

A project that is entirely driven by acoustic design. The delicate balance of hard surfaces and acoustic slatted walls all over the office is effective and cost-efficient. The use of acoustic lighting and acoustic wall covering gives the space an elegant flair while keeping the fun and comfort.

ACOUSTIC LIGHTING

The correct use of light in combination with acoustics creates a sense of well-being and increases our performance. We have brought together the best acoustic products with the latest lighting technologies - developed by Bartenbach and manufactured in Switzerland.

VERTIGO

ACOUSTIC WALL PANELS AND CEILING Baffles.
TORADEX.

VERTIGO is a highly effective, flexible and cost-effective acoustic solution. The vertical v-cut lines blend very well to the existing or new space. It is designed to cover surface up to the last millimetre and could be cut on-site according to wall measurement.

ACOUSTIC WALL PANELS

Acoustic wall panels are an effective alternative to acoustic ceilings, especially in small and narrow rooms. We offer an extensive range of standard & bespoke products to spark your creativity and endless imagination.

Unlimited possibilities

THE
SOUND
OF
COLOUR

This colour collection is created with an understanding of developing and enduring colour trends and the stories behind them.

As individuals, our tastes and preferences are informed by wider macro influences, from the political and social climate to environmental concerns and technology advances. We have taken these influences and translated them into a range of versatile neutrals and directional highlights. Each one plays their role in eight emotive stories designed to encapsulate the prevailing moods in colour.
