## About MURATTO

Did you know that a single cork tree can produce about 100 pounds of cork every 9 years for up to 200 years?

Muratto works with sustainable organic raw materials, leftovers from the wine cork industry, to produce high quality natural biodegradable acoustic surfaces.

Lightweight and modular, the cork panels are easy to install. They come in a wide range of colors and shapes, which can be used to cover entire wall surfaces or arranged in smaller configurations as functional wall art.
